

Health Language®

## Solutions Designed for Health Information Exchanges (HIEs)

*Now more than ever, HIEs are playing a central role in connecting the healthcare ecosystem by acting as the data hubs capable of managing a growing number of disparate data types and varying standards.*

As technologies, standards and compliance mandates evolve, HIEs will be expected to manage larger amounts of data from emerging and variable sources. With this comes the need for data-mapping and data normalization supported by out of the box compatibility with FHIR, USCDI, SNOMED CT®, LOINC®, RxNorm, mandated APIs, and other standards. **Fully enabled HIEs are key to advancements in healthcare in the 21st century.**

### Health Language Solutions Designed for HIEs:

We offer a suite of solutions that help HIEs manage and benefit from both structured and unstructured data from EHRs, labs, pharmacies/PBMs, registries, diagnostic studies, and multiple other sources. We provide tools and services to help map data to standard terminologies such as ICD-10-CM, HCPCS, SNOMED CT, CPT®, and LOINC. By implementing our solutions, HIEs are able to:

- ✓ Improve patient outcomes
- ✓ Enhance performance in quality-based and risk adjustment programs
- ✓ Reduce costs
- ✓ Identify social determinants of health
- ✓ Eliminate need for manual updates
- ✓ Establish network-wide data governance

# Health Language solutions help unlock the power of data, transforming it from abstract to actionable.

## Reference Data Management Solution

Centralize and manage clinical, claims, provider alerts, and administrative data to ensure that the HIE is the single source of truth for your clients.

- ✓ Enterprise Code Set Management
- ✓ Modeling of Proprietary Content to Industry Standards
- ✓ Clinical Registry Data Access and Reporting
- ✓ Deduplication of Data
- ✓ Syndromic Surveillance
- ✓ Enhanced Performance in Shared-risk Programs

## Interoperability and Data Normalization Solution

Normalize clinical and business data to standard terminologies, automatically map local data to standards, or model and create custom mappings to standards. Leveraging enhanced data normalization enables full semantic interoperability for accurate reporting and analytics, and improved performance in clinical care initiatives.

- ✓ HEDIS®/Quality Measure Reporting
- ✓ Analytics and Population Health Initiatives
- ✓ Clinical Decision Support
- ✓ Care and Disease Management

## Regulatory Compliance Solutions

Minimize your risk of audit penalties and increase member satisfaction. Our *Consumer Friendly Descriptions* and *Sensitivity Codes* consist of data files that easily and safely allow members to access their medical health records and protect sensitive information, in the language they understand. Comply with HIPAA and 42 CFR Part 2, minimize audit risk, and increase compliance for CMS Part C and Part D. Health Language is a licensed distributor for CPT®, CDT®, DSM-5®, RxNorm, and many other standards.

## Clinical Natural Language Processing (cNLP) Solution

Unlock the insights captured in unstructured data sources such as medical history and clinician notes within the EHR. Leverage clinically tuned NLP technology to extract clinically relevant medical insights that can enrich the data, offering a more comprehensive view of the patient resulting in more accurate population health and analytics initiatives.

## About Health Language

Health Language provides an innovative suite of healthcare solutions designed to improve your organization's data quality and enable semantic interoperability. Our solutions help health plans, providers, and health IT vendors transform data from abstract to actionable to effectively optimize reimbursement, manage risk, support quality initiatives, comply with regulations, improve operational efficiencies, and enhance analytics.

CPT® is a registered trademark of the American Medical Association (AMA).

LOINC® is a registered trademark of Regenstrief Institute, Inc.

SNOMED CT® is a registered trademark of the International Health Terminology Standards Development Organisation (IHTSDO).

## Customized Support Services to Meet Your Needs

Implementation and Consulting Services are available to help HIEs implement optimal data governance infrastructures in order to fully realize the potential of clean, accurate, and complete data.

We also supply Staff Augmentation and Management Services for short-term or long-term projects.
